

Vacancy announcement for the position of Application Software Engineer

ISDM

Location: Noida

Reports to: Chief Digital Officer

Position: Application Software Engineer

About ISDM

Established in 2016, the Indian School of Development Management (ISDM) is an institution that recognises that the development space urgently needs the application of management tenets to professionalise and optimise the billions of dollars invested for social impact. ISDM envisions establishing Development Management as a transdisciplinary domain and an aspirational choice for professionals in the development sector.

Key Responsibilities

- Develop a deep understanding of the applications and perform root cause analysis and problem resolution.
- Work with the business stakeholders, and document issues and bugs that emerge.
- Coordinate with partners and vendors in resolving issues.
- Escalate high priority and critical issues to the management.
- Perform testing of the applications and provide training.
- Perform data analysis.

Educational Qualifications and Experience required

- 5-6 years of experience in Application Management and support
- High proficiency in PL/SQL and Excel required.
- Good communication skills and the ability to work as a team player.
- Experience in the education domain will be given preference.

Please send in your applications to people@isdms.org.in. Remuneration shall be commensurate with experience and qualifications.

ISDM is an equal opportunity organisation with a particular emphasis on affirmative action. The culture of the organisation is one of professionalism while also one that greatly values relationships.
