Vacancy announcement for the position of Product Designer/System Analyst

ISDM

Location: Noida

Reports to: Chief Digital Officer

Position: Product Designer/System Analyst

About ISDM

Established in 2016, the Indian School of Development Management (ISDM) is an institution that recognises that the development space urgently needs the application of management tenets to professionalise and optimise the billions of dollars invested for social impact. ISDM envisions establishing Development Management as a transdisciplinary domain and an aspirational choice for professionals in the development sector.

Key Responsibilities

- Coordinate between business stakeholders and the tech team, partners and vendors.
- Conduct Functional and UAT testing as per the requirements.
- Benchmark applications against industry standards and make recommendations.
- Provide training to business stakeholders.
- Continuously evaluate the process and enable product improvement opportunities.

Educational Qualifications and Experience required

- 5-6 years of experience in Product Design.
- Experience in working with business stakeholders and capturing detailed user requirements i.e., User Journeys, SRS, Process Flows, Wireframe & Prototypes.
- Ability to capture both functional and non-functional requirements
- Good communication skills and the ability to be a team player
- Experience in the education domain will be given preference.

Please send in your applications to people@isdm.org.in. Remuneration shall be commensurate with experience and qualifications.

ISDM is an equal opportunity organisation with a particular emphasis on affirmative action. The culture of the organisation is one of professionalism while also one that greatly values relationships.
